Check out the demo's Nov 29, 2017 Omnisphere 2 is an 8-part multitimbral VSTi, meaning you can play up to 8 different sounds at once with one instantiation.. Dec 31, 2015 #1 Has anybody created a sound set of patches for Omnisphere 2 that utilizes the ability to use custom samples yet? I'm surprised I haven't seen a whole lot of people capitalizing on that.. Serum can only play one sound at a time, so if you want to play more than that, you'll have to have to use a different instantiation for each different sound you use from it.
